○ JasonAnx

*B.S. in Computer Science. Musician. English Literature
and Classical Guitar Student at the
University of Costa Rica.*

Being immersed in the arts world gave me insight to understand that I can't just sit and maintain, support, or develop 'solutions' to known problems; I like to **create**, to take new problems and puzzles and work my way to their solutions. I want to **innovate**.

Education

Computer Science
Bachelor
University of Costa Rica

English Literature
Bachelor
University of Costa Rica

Classical Guitar
Bachelor
University of Costa Rica

Experience

Developer

— University of Costa Rica —   *2017*

Web developer at UCR's IT Teaching Support Unit (METICS) using React + Redux (JavaScript), Moodle (PHP & JavaScript), HTML5 and CSS 3 (Bootstrap), with a Back-End using postgresql, webpack, NodeJS and NPM. Worked with the University's educational platform, as well as internal systems.

Software Engineering Teaching Assistant
— *University of Costa Rica* — *2016 & 2017*
Assistant for the Software Engineering I and II courses at UCR during the I and II half of 2016, and II half of 2017, teaching project management and agile technologies.

Introduction to Programming Teaching Assistant
— *University of Costa Rica* — *2015*
Assistant for the Introduction to Programming course for the I and II half of 2015, teaching basic programing concepts like functions, iteration, Objects, I/O and Recursivity.

Languages

Spanish   *Native*
English   *Business C2*

Computer skills

Programming: CSS 3, Bootstrap 3, C, C#, C++, Java, HTML5, Android, PHP, CakePHP, QT, SQL, Oracle SQL, Python, JavaScript, React JS, Redux JS, Node JS, Wordpress, Cassandra DB

Office: Microsoft Office, LibreOffice, OpenOffice

Others: LaTeX, R, Git

Another Interests

Guitar: Member of the UCR Guitar Orchestra, where I had the oportunity to record a CD with the University Philharmonic

Basketball: On weekends

Literature: Academic study of Classical and English literature

Being a Computer Science student and a member of the University Orchestra—while having a developer position at an academic unit of my University—taught me how to handle multiple projects and tasks at once, and how to manage my time and make priorities.

I'm passionate about UX and management. I have a high sense of initiative and attention to details, always keeping in mind the stakeholder/final user needs as the priority.

I consider that I have good communication and leadership skills. Moreover, I can recognize when a problem is out of my scope, and I will reach out to others without hesitation to get answers and get the work done.
